I SECURITY CONSIDERATIONS

No security considerations have been made for this document.

1 SCOPE

1 SCOPE

This sample demonstrates metanorma-ogc#153: the normative sections below are generated from the OpenAPI definitions carried in this document's source tree (ogcapi-features-1-oas31.yaml, ogcapi-features-1-oas30.yaml — copied verbatim from the opengeospatial/ogcapi-features repository) through metanorma-plugin-openapi and lutaml-openapi.

2

BUILDING BLOCKS SPECIFIED IN OGC API — FEATURES — PART 1: CORE

2 BUILDING BLOCKS SPECIFIED IN OGC API — FEATURES — PART 1: CORE

API version: 3.1.1 Common components used in the OGC standard “OGC API — Features — Part 1: Core”.

OGC API — Features — Part 1: Core 1.1 is an OGC Standard. Copyright © 2024 Open Geospatial Consortium. To obtain additional rights of use, visit https://www.ogc.org/legal/ .

This document is also available on OGC.

3 SCHEMAS

3 SCHEMAS

3.1. collection

Type: object

Table 1 — Properties of collection

NAME	TYPE	DESCRIPTION
crs	array	the list of coordinate reference systems supported by the service
defaultItemsPageSize	integer	the number of features that the server returns in a response to a request to the features in the collection without a limit parameter
description	string	a description of the features in the collection
extent	``	
id	string	identifier of the collection used, for example, in URIs
itemType	string	indicator about the type of the items in the collection (the default value is 'feature').
linkTemplates	array	
links	array	
maximumItemsPageSize	integer	the maximum number of features that the server returns in a response to a request to the features in the collection
title	string	human readable title of the collection

3.2. collections

Type: object

Table 2 — Properties of collections

NAME	TYPE	DESCRIPTION
collections	array	
links	array	

3.3. confClasses

Type: object

Table 3 — Properties of confClasses

NAME	TYPE	DESCRIPTION
conformsTo	array	

3.4. exception

Type: object

Table 4 — Properties of exception

NAME	TYPE	DESCRIPTION
detail	string	A human-readable explanation specific to this occurrence of the problem.
instance	string	A URI reference that identifies the specific occurrence of the problem. It may or may not yield further information if dereferenced.
status	integer	The HTTP status code generated by the origin server for this occurrence of the problem.
title	string	A short, human-readable summary of the problem type.
type	string	A URI reference that identifies the problem type.

3.5. extent

The extent of the features in the collection. In the Core only spatial and temporal extents are specified. Extensions may add additional members to represent other extents, for example, thermal or pressure ranges.

Type: object

Table 5 — Properties of extent

NAME	TYPE	DESCRIPTION
spatial	object	The spatial extent of the features in the collection.
temporal	object	The temporal extent of the features in the collection.

3.6. featureCollectionGeoJSON

Type: object

Table 6 — Properties of featureCollectionGeoJSON

NAME	TYPE	DESCRIPTION
features	array	
links	array	
numberMatched	``	
numberReturned	``	
timeStamp	``	
type	string	

3.7. featureGeoJSON

Type: object

Table 7 — Properties of featureGeoJSON

NAME	TYPE	DESCRIPTION
geometry	``	
id	string, integer	
links	array	
properties	object,	
type	string	

3.8. geometryGeoJSON

3.9. geometrycollectionGeoJSON

Type: object

Table 8 — Properties of geometrycollectionGeoJSON

NAME	TYPE	DESCRIPTION
geometries	array	
type	string	

3.10. landingPage

Type: object

Table 9 — Properties of landingPage

NAME	TYPE	DESCRIPTION
description	string	
links	array	
title	string	

3.11. linestringGeoJSON

Type: object

Table 10 — Properties of linestringGeoJSON

NAME	TYPE	DESCRIPTION
coordinates	array	
type	string	

3.12. link

Type: object

Table 11 — Properties of link

NAME	TYPE	DESCRIPTION
href	string	
hreflang	string	
length	integer	
rel	string	
title	string	
type	string	

3.13. linkTemplate

Type: object

Table 12 — Properties of linkTemplate

NAME	TYPE	DESCRIPTION
rel	string	
title	string	
type	string	
uriTemplate	string	
varBase	string	

3.14. multilinestringGeoJSON

Type: object

Table 13 — Properties of multilinestringGeoJSON

NAME	TYPE	DESCRIPTION
coordinates	array	
type	string	

3.15. multipointGeoJSON

Type: object

Table 14 — Properties of multipointGeoJSON

NAME	TYPE	DESCRIPTION
coordinates	array	
type	string	

3.16. multipolygonGeoJSON

Type: object

Table 15 — Properties of multipolygonGeoJSON

NAME	TYPE	DESCRIPTION
coordinates	array	

NAME	TYPE	DESCRIPTION
type	string	

3.17. numberMatched

The number of features of the feature type that match the selection parameters like bbox.

Type: integer

3.18. numberReturned

The number of features in the feature collection.

A server may omit this information in a response, if the information about the number of features is not known or difficult to compute.

If the value is provided, the value shall be identical to the number of items in the “features” array.

Type: integer

3.19. pointGeoJSON

Type: object

Table 16 — Properties of pointGeoJSON

NAME	TYPE	DESCRIPTION
coordinates	array	
type	string	

3.20. polygonGeoJSON

Type: object

Table 17 — Properties of polygonGeoJSON

NAME	TYPE	DESCRIPTION
coordinates	array	
type	string	

3.21. timeStamp

This property indicates the time and date when the response was generated.

Type: string
